

# INSTALLATION INSTRUCTIONS

Part Number YA-6050

**This filter fits:** SEE CATALOG FOR CURRENT APPLICATIONS

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N Air Filter seals properly.

## INSTALLATION

1. Remove the stock air filter.
2. Apply the provided gasket to the open side of the K&N Air Filter.
3. Cut the tip off the provided oil pillow pack.
4. Run the tip of the oil pillow pack along the edge of each pleat.  
**Note:** Use only 1/2 of the oil pillow pack. If the entire oil pillow pack is used the filter will be over oiled.
5. Apply a thin layer of K&N Sealing Grease. This will help the K&N Air Filter to slide into the air box without tearing the gasket.
6. Install the K&N Air Filter into the air box.
7. Reinstall the side cover.

**THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.**
